

# Sharing Technology Growing Together

Sharing  
Technology  
Growing

Open Source Consulting Inc. has focused on building technology solutions and services for “Cloud and Collaboration”, since its establishment in 2012.

Experts at Open Source Consulting have been developing cloud solutions based on open source software. We are continuously developing and servicing opensource, public and private cloud, data center automation and IoT related solutions. In addition to these expertise and experience, we can provide high-quality solutions and comprehensive methodology consulting services.
